

Corporate Overview

Amsin has partnered with Fortune 500 companies to **support State and Local Governments and the private sector**. Establishing itself as a subject matter expert in complex software design and development, particularly within the **.NET ecosystem**.

Helping the state government generate increased revenue of more than **\$37 million** in a quarter and increasing 800k active online users and 300k+ new registrations with **\$30 million +** in revenue in a month for the commercial client.

Amsin has **teamed with prime contractors** looking for expertise and competitive advantage with Amsin's past performance both in the private and public sectors. **Our executive team, boasting a cumulative experience of 20+ years**, has consistently demonstrated unparalleled expertise and strategic vision.

Past Performances

Fiserv (New York City Property Tax)

Our executive team worked with the prime contractor to **modernize the legacy application** collecting the property tax in New York City (NYC). NYC has provided its residents with the feature to pay the property tax conveniently online and customize it according to their requirements. However, this application was built on a very old technology and has many issues with no scope for enhancement. It could not keep up with the growing customer demands, and there was a dire need to fix the platform. During modernization, the application was migrated to the .Net framework and angular 16, and the legacy services were migrated with Restful services with .Net 6.0

Fiserv (Pennsylvania State Business Application)

Our executive team worked with the prime contractor to fix the broken autopay functionality for collecting business tax. Pennsylvania has provided its residents with the feature of auto-pay to pay the property tax conveniently. However, its billing and payment methods needed to keep up with customer demands, and there was a dire need to fix the platform. During modernization, the **system was re-engineered** to C#.Net framework 4.6.0, and the import/export process in .Net was enhanced to communicate with Fiserv's newly implemented IVR (Interactive Voice Response) application.

Boeing (upgraded supply chain)

Boeing was Migrating data from the legacy Cardex system to S/4HANA. Our executive team worked with the prime contractor on this migration, dealing with data structure differences and integrating issues, as well as challenges in data synchronization and potential errors. **Upgraded the legacy Cardex system to S/4HANA, leveraging digital technology for efficient supply chain management**. Implemented IBM MQ for secure data exchange between S/4HANA and ATG and used PI/PO for seamless SAP and legacy system integration.

Hitachi (biBerk Insurance)

biBerk has been struggling with challenges from the aging web application, maintaining policy, claims, and older data while meeting compliance and financial metrics. The prime contractor is building a **new web application** with many advanced features. As a team partner, our executive team is working with the prime contractor to implement email communication with the customers. Sending them the right quotes, suggested quotes, pulled that data from their search, and sent them reminder emails using microservice architecture and Microsoft Azure (cloud).

Core Competencies

Application Development/Modernization	Cloud Computing (Azure, AWS)	IT Staffing	Program Management
Planning	Assessment	Staff Augmentation	Project Management
Design	Cloud strategy development	Software Developer	Master Budget Development
Development	Cloud Implementation	Quality Engineer	Cost Management
Testing	Cloud Optimization	DevOps Engineer	Change Management
Deployment	Cloud Migration		Stakeholder Management
Maintenance	DevOps		
Support	CI/CD		

Differentiators

We have developed hundreds of applications using .NET technologies and frameworks.

Team of seasoned .NET developers with 15+ years of experience each.

Fast development due to outstanding .NET proficiency

Application Modernization -architecture, performance, security enhancement, improving UI/UX, adding CI/CD.

Cloud Computing (Microsoft Azure)

Certified Azure Developers on board.

Company Data

SAM UEI: LZF7PWNPWLA6

Cage Code: 9C6H1

Primary NAICS: 541511

Additional NAICS: 541512, 541519, 541611, 561311

PSC: DA10, DA01, R408, R410, 7030
